CANCEL   Acquire

#4 Prepare/position patient for first view

#5 Select view from option on left (selected view is yellow)

#6 Click the "Acquire" button when you are ready to take the X-Ray

Acquire

Once you see

READY FOR EXPOSURE
28 sec

across the screen, you may take an X-Ray exposure

*you have 30 seconds, if the exposure is not taken, it will time out, and you must click the Acquire button again

*if an x-ray exposure is taken BEFORE 'READY FOR EXPOSURE' appears, it will NOT see the x-ray resulting in another duplicate x-ray exposure to be taken

Left & Right markers are located near the top under 'Annotations'

Note If the AUTO-SHUTTER/CROP feature fails (image is cut off):
1. Move the outer-most purple lines outward to include the cut-off anatomy
2. Click the "Apply" button

#7 Select the ✅ (near the top right) if the image will be saved
Select the ❌ if the image needs to be discarded for any reason
Repeat from step #4 until you are finished, then go to the next step

#8 Click the Exit button when you are finished with the exam
