In order to utilize the Zoom to Actual Size icon ( ), you must first calibrate your monitors within the Opal Viewer. Once in the Opal Viewer, go to: **Settings >> Edit**

**Under the Local Option tab:**

1. Select each monitor to calibrate.
2. Using a ruler or other measurement device, measure the width and height of your monitor (**inside the display border**) in mm units.
3. Enter information, then hit OK

Now the Zoom to Actual Size tool ( ) will be active and ready to use when needed.
