Setup Opal-RAD Workstation for viewing *(browser based)*

1.   Open Internet Explorer Browser

2.   Type the location of the Server in the Address bar: (ie. **http://OPAL_QC/** or **http://IP Address/**) and hit Enter

   NOTE: Internet Explorer must be used, all other web browsers are not compatible*

   If desired, you may turn on/allow Intranet Settings If you receive a prompt
   You may skip step 3 if Intranet settings are enabled *(enables for Server connection only)*

 | Intranet settings are turned off by default. | Don't show this message again | Turn on Intranet settings | × |
   |---|---|---|---|

3.   Enable 'Compatibility View' (if available, see below)

   1.   See if the Compatibility View button 🖼 appears in the Address bar. (If you don't see the button, there's no need to turn on Compatibility View.)
   2.   Tap or click the Compatibility View button 🖼 to display the site in Compatibility View

4.   Restore down browser (so it is not full screen)

5.   Select 20/20 logo/icon to the left of the address bar, click and drag it onto the Desktop to create a shortcut

6.   Login

7.   You will be prompted to install '**OpalViewer**'. This is a safe program. Click OK to allow install

8.   After OpalViewer is installed, you will be asked to allow '**OpalWebKicker**'. This is necessary for viewing software to run correctly

This webpage wants to run the following add-on: 'OpalWebKicker' from 'Viztek LLC (unverified publisher)'. What's the risk?	Allow ▾	×

   Click 'Allow'. The session might log you off, this is normal. Simply log back in

9.   Your viewer is now complete

*mOpal is available for other browsers as well as mobile and smart devices. See website or contact 20/20 Imaging for details
